Contents of volume 29

No. 1 (pp 1–106) published July 17, 1988
No. 2/3 (pp 107–304) published August 29, 1988
No. 4 (pp 305–412) published September 26, 1988
No. 5 (pp 413–522) published October 26, 1988
No. 6 (pp 523–620) published November 24, 1988

Biotechnology

Aleksieva P, Tchorbanov B, Suchodol'skaya G, Koschteenko K: Production of acid proteinases by *Humicola lutea* immobilized in polyacrylamide gel (Short contribution) 239

Alvarez R, Enriquez A: Nucleic acid reduction in yeast 208

Andersson E, Hahn-Hägerdal B: High concentrations of PEG as a possible uncoupler of the proton motive force: α-Amylase production with *Bacillus amyloliquefaciens* in aqueous two-phase systems and PEG solutions 329

Asano Y, Endo K: Amino acid racemase with broad substrate specificity, its properties and use in phenylalanine racemization 523

Audet P, Paquin C, Lacroix C: Immobilized growing lactic acid bacteria wit κ-carrageenan — locust bean gum gel 11

Bailliez C, Largeau C, Casadevall E, Yang LW, Berkaloff C: Photosynthesis, growth and hydrocarbon production of *Botryococcus braunii* immobilized by entrapment and adsorption in polyurethane foams 141

Barbeau JY, Marchal R, Vandecasteele, JP: Conditions promoting stability of solventogenesis or culture degeneration in continuous fermentations of *Clostridium acetobutylicum* 447

Büchs J, Mozes N, Wandrey C, Rouxhet PG: Cell adsorption control by culture conditions. Influence of phosphate on surface properties, flocculation and adsorption behaviour of *Corynebacterium glutamicum* 119

Cazzador L, Mariani L: A simulation program based on a structured population model for biotechnological yeast processes 198

Chang HN, Moo-Young M: Estimation of oxygen penetration depth in immobilized cells 107

Ching CB, Chu KH: Modelling of a fixed bed and a fluidized bed immobilized enzyme reactor 316

Chun UH, Rogers PL: The simultaneous production of sorbitol from fructose and gluconic acid from glucose using an oxidoreductase of *Zymomonas mobilis* 19

Delgenes JP, Moletta R, Navarro JM: Fermentation of D-xylose, D-glucose and L-arabinose mixture by *Pichia stipitis* Y 7124: sugar tolerance 155

D'Souza SF, Kamath N: Cloth bioreactor containing yeast cells immobilized on cotton cloth using polyethylenimine 136

El-Aassar SA, Omar SH, Rehm H-J: Oxidation of n-tetradecane by *Candida parapsilosis* KSh 21 adsorbed on different glass rings 442

Facchini PJ, Neumann AW, DiCosmo F: Thermodynamic aspects of plant cell adhesion to polymer surfaces 346

Flieger M, Votruba J, Křen V, Pažoutová S, Rylko V, Sajdl P, Řeháček Z: Physiological control and process kinetics of clavine alkaloid production by *Claviceps purpurea* 181

Furukawa S, Ozaki A, Nakanishi T: L-Threonine production by L-aspartate- and L-homoserine-resistant mutant of *Escherichia coli* 550

Furusaki S, Nozawa T, Isohara T, Furuya T: Influence of substrate transport on the activity of immobilized *Papaver somniferum* cells 437

Ghosh VK, Deb JK: Production and characterization of xylanase from *Thielaviopsis basicola* 44

Godbole SS, Rao BYK, Bandyopadhyay C, D'Souza SF: Physicochemical alterations in desugared buffalo milk after fermentation with *Saccharomyces fragilis* 219

Gosmann B, Rehm H-J: Influence of growth behaviour and physiology of alginate-entrapped microorganisms on the oxygen consumption 554

Herold T, Bayer T, Schügerl K: Cephalosporin C production in a stirred tank reactor 168

Hörmeyer HF, Tailliez P, Millet J, Girard H, Bonn G, Bobleter O, Aubert J-P: Ethanol production by *Clostridium thermocellum* grown on hydrothermally and organosolv-pretreated lignocellulosic materials 528

Jauneau A, Morvan C, Fenyo JC, Demarty M: Pectate lyase production by *Bacillus subtilis* in a membrane bioreactor 234

Kobayashi M, Nagasawa T, Yamada H: Regiospecific hydrolysis of dinitrile compounds by nitrilase from *Rhodococcus rhodochrous* J1 231

Leonowicz A, Sarkar JM, Bollag J-M: Improvement in stability of an immobilized fungal laccase 129

Lloberas J, Querol E, Bernués J: Purification and characterization of endo-β-1,3-1,4-D-glucanase activity from *Bacillus licheniformis* 32

Mes-Hartree M, Dale BE, Craig WK: Comparison of steam and ammonia pretreatment for enzymatic hydrolysis of cellulose 462

Mitsuda S, Umemura T, Hirohara H: Preparation of an optically pure secondary alcohol of synthetic pyrethroids using microbial lipases 310

Neale AD, Scopes RK, Kelly JM: Alcohol production from glucose and xylose using *Escherichia coli* containing *Zymomonas mobilis* genes 162

Özadali F, Özilgen M: Microbial growth kinetics of fed-batch fermentations 203

Özilgen M: Kinetics of multiproduct acidogenic and solventogenic batch fermentations 536

Papageorgiou GC, Kalosaka K, Sotiropoulou G, Barbotin JN, Thomasset B, Thomas T: Entrapment of active ion-permeable cyanobacteria *(Anacystis nidulans)* in calcium alginate 565

Peillex J-P, Fardeau M-L, Boussand R, Navarro J-M, Belaich J-P: Growth of *Methanococcus thermolithotrophicus* in batch and continuous culture on H_2 and CO_2: influence of agitation 560

Persson A, Österberg E, Postalek M: Biosurfactant production by *Pseudomonas fluorescens* 378: growth and product characteristics 1

Piehl G-W, Berlin J, Mollenschott C, Lehmann J: Growth and alkaloid production of a cell suspension culture of *Thalictrum rugosum* in shake flasks and membrane-stirrer reactors with bubble free aeration 456

Pundle A, Prabhune A, SivaRaman H: Immobilization of *Saccharomyces uvarum* cells in porous beads of polyacrylamide gel for ethanolic fermentation 426

Qureshi N, Paterson AHJ, Maddox IS: Model for continuous production of solvents from whey permeate in a packed bed reactor using cells of *Clostridium acetobutylicum* immobilized by adsorption onto bonechar 323

Ramgren M, Andersson E, Hahn-Häderdal B: α-Amylase production with *Bacillus subtilis* in the presence of PEG and surfactants 337
Ramírez ME, Fucikovsky L, García-Jiménez F, Quintero R, Galindo E: Xanthan gum production by altered pathogenicity variants of *Xanthomonas campestris* 5
Rizzi M, Erlemann P, Than N-AB, Dellweg H: Xylose fermentation by yeasts. 4. Purification and kinetic studies of xylose reductase from *Pichia stipitis* 148
Ross A, Schügerl K: Tetracycline production by *Streptomyces aureofaciens:* the time lag of production 174
Schmitt P, Couvreur C, Cavin JF, Prévost H, Diviès C: Citrate utilization by free and immobilized *Streptococcus lactis* subsp. *diacetylactis* in continuous culture 430
Schwarz WH, Schimming S, Staudenbauer WL: Degradation of barley β-glucan by endoglucanase C of *Clostridium thermocellum* 25
Shirai Y, Hashimoto K, Yamaji H, Kawahara H: Oxygen uptake rate of immobilized growing hybridoma cells 113
Shirai Y, Sasaki R, Hashimoto K, Kawahara H, Hitomi K, Chiba H: Continuous production of erythropoietin with immobilized animal cells 544
Silbiger E, Freeman A: Continuous non-aerated Δ^1-dehydrogenation of hydrocortisone by PAAH-bead entrapped *Arthrobacter simplex* 413
Szakács-Dobozi M, Halász A, Kozma-Kovács E, Szakács G: Enhancement of mustard oil yield by cellulolytic pretreatment 39
Van den Tweel WJJ, Smits JP, Ogg RLHP, De Bont JAM: The involvement of an enantioselective transaminase in the metabolism of D-3- and D-4-hydroxyphenylglycine in *Pseudomonas putida* LW-4 224
Watanabe E, Endo H, Toyama K: Determination of inosine-5'-monophosphate in the presence of inosine and hypoxanthine with an enzyme sensor 341
Wehtje E, Adlercreutz P, Mattiasson B: Activity and operational stability of immobilized mandelonitrile lyase in methanol/water mixtures 419
Yerushalmi L, Volesky B, Votruba J: Fermentation process diagnosis using a mathematical model 186
Yi Z-H, Rehm H-J: Bioconversion of elaidic acid to Δ^9-trans-1,18-octadecenedioic acid by *Candida tropicalis* 305
Ykema A, Verbree EC, Kater MM, Smit H: Optimization of lipid production in the oleaginous yeast *Apiotrichum curvatum* in wheypermeate 211

Applied genetics and regulation

Asada Y, Kimura Y, Kuwahara M, Tsukamoto A, Koide K, Oka A, Takanami M: Cloning and sequencing of a lignin-degrading basidiomycete, *Phanerochaete chrysosporium* 469
Chambers SP, Prior SE, Evans RA, Sherwood RF, Minton NP: Plasmid pMTL153: a high copy number version of pAT153 and its use to obtain high expression of the *Pseudomonas* carboxypeptidase G_2 gene 572
Furukawa K, Suzuki H: Gene manipulation of catabolic activities for production of intermediates of various biphenyl compounds 363
Furukawa S, Azuma T, Nakanishi T, Sugimoto M: Breeding an L-isoleucine producer by protoplast fusion of *Corynebacterium glutamicum* 248
Furukawa S, Ozaki A, Kotani Y, Nakanishi T: Breeding of L-threonine hyper-producer of *Escherichia coli* W 253
Hinrichs J, Stahl U, Esser K: Flocculation in *Saccharomyces cerevisiae* and mitochondrial DNA structure 48
Honda H, Saito T, Iijima S, Kobayashi T: Isolation of a new cellulase gene from a thermophilic anaerobe and its expression in *Escherichia coli* 264
Magnouloux-Blanc B, Portalier R: Overproduction and excretion of β-lactamase and alkaline phosphatase by *Escherichia coli olp* mutants 258
Thierbach G, Schwarzer A, Pühler A: Transformation of spheroplasts and protoplasts of *Corynebacterium glutamicum* 356
Zhang J, Wolfe S, Demain AL: Phosphate repressible and inhibitable β-lactam synthetases in *Cephalosporium acremonium* strain C-10 242

Applied microbiology

Al-Awadhi N, Egli T, Hamer G: Growth characteristics of a thermotolerant methylotrophic *Bacillus* sp. (NCIB 12522) in batch culture 485
Alexander MA, Yang VW, Jeffries TW: Levels of pentose phosphate pathway enzymes from *Candida shehatae* grown in continuous culture 282
Bailey MJ: A note on the use of dinitrosalicylic acid for determining the products of enzymatic reactions 494
Barber J, Chapman AC, Howard TD, Tebb G: Recycling of polyketides by fungi: the degradation of citrinin by *Penicillium citrinum* 387
Böttcher UF, Trojanowski J, Hüttermann A: New form of lignolytically active mycelium generated by immobilization of protoplast isolated from the white rot fungi *Heterobasidion annosum* and *Polyporus pinsitus* 380
Buchert J, Viikari L: Oxidative D-xylose metabolism of *Gluconobacter oxydans* 375
Buchholz SE, O'Mullan P, Eveleigh DE: Growth of *Zymomonas mobilis* CP4 on mannitol 275
Cerezine PC, Nahas E, Banzatto DA: Soluble phosphate accumulation by *Aspergillus niger* from fluorapatite 501
Dekker RFH: Inhibitors of *Trichoderma reesei* β-glucosidase activity derived from autohydrolysis-exploded *Eucalyptus regnans* 593
Gervais P, Fasquel J-P, Molin P: Water relations of fungal spore germination 586
Hörnsten EG, Nilsson L, Winquist F, Elwing H, Lundström I: Measurement of ammonium utilization by *Escherichia coli* under ammonium limitation by means of an ammonia-sensitive semiconductor device 269
Kemp GD, Dickinson FM, Ratledge C: Inducible long chain alcohol oxidase from alkane-grown *Candida tropicalis* 370
Leelasart B, Bonaly R: Effect of control of pH on the excretion of acid phosphatase by *Rhodotorula glutinis* 579
Lighthelm ME, Prior BA, du Preez JC: The effect of respiratory inhibitors on the fermentative ability of *Pichia stipitis, Pachysolen tannophilus* and *Saccharomyces cerevisiae* under various conditions of aerobiosis (Short contribution) 67
Omori T, Hatakeyama K, Kodama T: Protacatechuic acid from *trans*-ferulic acid by *Pseudomonas* sp. HF-1 mutants defective in protocatechuic acid catabolism 497
Poulsen OM, Petersen LW: Growth of *Cellulomonas sp. ATCC 21399* on different polysaccharides as sole carbon source induction of extracellular enzymes 480
Takase M, Horikoshi K: A thermostable β-glucosidase isolated from a bacterial species of the genus *Thermus* 55
Taya M, Hinoki H, Yagi T, Kobayashi T: Isolation and characterization of an extremely thermophilic, cellulolytic, anaerobic bacterium 474

Towprayoon S, Saha BC, Fujio Y, Ueda S: Some characteristics of a raw starch digestion inhibitory factor from *Aspergillus niger* 289
Visser S, Slangen CJ, Exterkate FA, de Veer GJM: Action of a cell wall proteinase (P_I) from *Streptococcus cremoris* HP on bovine β-casein 61

Environmental microbiology

Beunink J, Rehm H-J: Synchronous anaerobic and aerobic degradation of DDT by an immobilized mixed culture system 72
Cabras P, Meloni M, Pirisi FM, Farris GA, Fatichenti F: Yeast and pesticide interaction during aerobic fermentation 298
De la Noüe J, Proulx D: Biological tertiary treatment of urban wastewaters with chitosan-immobilized *Phormidium* 292
Diekmann R, Nörtemann B, Hempel DC, Knackmuss H-J: Degradation of 6-aminonaphthalene-2-sulphonic acid by mixed cultures: kinetic analysis 85
Gadd GM, de Rome L: Biosorption of copper by fungal melanin 610
Gorris GM, van Deursen JMA, van der Drift C, Vogels GD: Influence of waste water composition on biofilm development in laboratory methanogenic fluidized bed reactors 95
Hutchinson DH, Robinson CW: Kinetics of the simultaneous batch degradation of *p*-cresol and phenol by *Pseudomonas putida* 599
Jannsen DB, Grobben G, Hoekstra R, Oldenhuis R, Witholt B: Degradation of *trans*-1,2-dichloroethene by mixed and pure cultures of methanotrophic bacteria 392
Khalil EF, Whitmore TN, Gamal-El-Din H, El-Bassel A, Lloyd D: The effects of detergents on anaerobic digestion 517
Köhler A, Jäger A, Willershausen H, Graf H: Extracellular ligninase of *Phanerochaete chrysosporium* Burdsall has no role in the degradation of DDT (Short contribution) 618
Op den Camp HJM, Verhagen FJM, Kivaisi, AK, de Windt FE, Lubberding HJ, Gijzen HJ, Vogels GD: Effects of lignin on the anaerobic degradation of (ligno) cellulosic wastes by rumen microorganisms 408
Parsons JR, Sijm DTHM, van Laar A, Hutzinger O: Biodegradation of chlorinated biphenyls and benzoic acids by a *Pseudomonas* strain 81
Quinn JP, Peden JMM, Dick RE: Glyphosate tolerance and utilization by the microflora of soils treated with the herbicide 511
Schulze D, Menkhaus M, Fiebig R, Dellweg H: Anaerobic treatment of protein-containing waste waters: correlation between coenzyme F_{420} and methane production 506
Thurnheer T, Cook AM, Leisinger T: Co-culture of defined bacteria to degrade seven sulfonated aromatic compounds: efficiency, rates and phenotypic variations 605
van den Heuvel JC, Beeftink HH, Verschuren PG: Inhibition of the acidogenic dissimilation of glucose in anaerobic continuous cultures by free butyric acid 89
Waldner R, Leisola MSA, Fiechter A: Comparison of ligninolytic activities of selected white-rot fungi 400

Rapid communications

Shiomi N, Fukuda H, Morikawa H, Fukuda Y, Kimura A: Cloning of a gene for S-adenosylmethionine synthesis in *Saccharomyces cerevisiae* 302
Tebbe CC, Reber HH: Utilization of the herbicide phosphinothricin as a nitrogen source by soil bacteria 103
